

CHECK THE POWER!

- Hydraulic
- Electric
- Pneumatic

Any light tools!

Under the power of **5-30N/m**

JUST IN **10** SEC.

**Power
Checker
PGH-30**

Oil Temperature Controller
Check the power correctly
even in cold climate.

How do you check the power?

For example, we used to stick a chisel into a big tire, and checked the power by feeling.

What kind of equipment is available to check?

- **Maruzen Breaker**

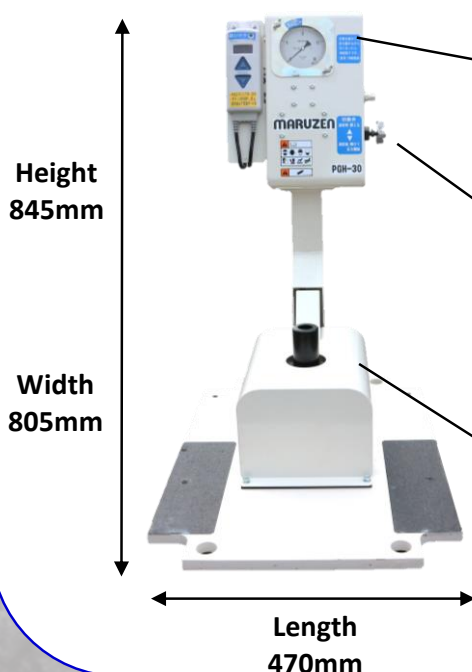

BH051

- **Other Equipment**

Any hydraulic, electric, pneumatic equipment of which impact power is 5-30N/m.

Simple and easy to maintenance

Oil Pressure Indication

Check the impact power on scale of Oil Pressure Indication.

Control Valve

Set equipment on the device, and just turn the Control Valve!

Cylinder of Hammering

Set the adapter on the device, and insert the equipment you want to check.

Ready to check the power!
